

CNC ROBOTICS LTD
MANUFACTURING EVOLUTION

Modern Slavery Policy

CNC Robotics Ltd, a manufacturing SME based in the UK, is committed to conducting its business with integrity and in compliance with all relevant laws and regulations, including those related to modern slavery and human trafficking. We recognise that modern slavery and human trafficking are serious issues affecting many communities globally and believe that it is our responsibility to take proactive steps to address and prevent such practices in our own operations and supply chain.

As part of our ongoing efforts to ensure compliance with the Modern Slavery Act 2015, we have taken the following steps:

1. **Commitment to Zero Tolerance:** CNC Robotics Ltd maintains a zero-tolerance approach towards modern slavery and human trafficking. We do not condone any form of forced labour, servitude, or human exploitation within our organisation or within our supply chain.
2. **Due Diligence:** We have conducted a review of our operations and supply chain to assess the risk of modern slavery and human trafficking and have implemented measures to mitigate those risks. This includes implementing appropriate due diligence processes for suppliers and conducting regular reviews of our supply chain to identify any potential areas of concern.
3. **Training:** We have provided training to all relevant employees on the issue of modern slavery and human trafficking and the measures we have put in place to address it. This includes training on how to recognise and report any suspected cases of modern slavery and human trafficking.
4. **Monitoring and review:** We will continue to monitor and review our modern slavery policy and practices on an ongoing basis to ensure that they remain effective in preventing modern slavery and human trafficking.
5. **Communication:** We will communicate our Modern Slavery Policy and the measures we have put in place to prevent modern slavery and human trafficking to all relevant stakeholders, including suppliers, customers and employees.
